

WHERE WE MAKE A DIFFERENCE

Veterans Alliance Partners is a supply chain and logistics provider that specializes in food service products such as paper, plastic, styrofoam, to include janitorial and sanitation supply. We provide expertise and support that uniquely positions our customers to be fully integrated into the global supply chain.

We are your one stop problem solver. Since 2017, we have supplied over 12,000,000 million units of product to the Bureau of Prisons and agencies within the United States government. Veterans Alliance Partners redefines the relationship between suppliers and government buyers. Our competitors take for granted customer service and government customers. Veterans Alliance Partners raises expectation because we operate on 4 sustainable pillars of business:

- Customer Satisfaction
- Communication
- Integrity
- Service

The supply chain faces several challenges until 2025. The global supply chain continues to reset from the Covid-19 pandemic in addition to historic inflation continuing to increase costs. Issues such as labor shortages, production freezes, inflation, freight cost and changes in international trade has disrupted the pre-pandemic supply of products throughout the United States.

Our strategy relies on a combination of relationship building and technology to address the supply chain headwind. First, we focus on relationships with established manufacturers, distributors, and experienced freight partners. Over 5 years, we expanded our inventory infrastructure from one warehouse in Phoenix, Arizona into a network of 96 locations and nearly 5,000,000 sq feet of warehouse space across the United States. Second, we use technology to track trends across the global supply chain, access live data on freight and compare product costs in real time.

Our job is to make your job easier. We remove headaches and strategize, research, negotiate and navigate every corner within the supply chain. We do the heavy lifting, so you are one text, email or call away from a solution. Bring us your challenges so we can leverage our resources and know-how to solve the problems you're facing. No matter how big or how small, we will provide customer satisfaction, straight forward communication, integrity, and service.
